

FRIENDSHIP FOR AMERICA HELD WANING IN EUROPE

Suspicious Silences of Our Statesmen, Sensational Rumors from Paris, May Leave Us Holding Bag.

BY HENRY M. HYDE.

(By Cable—EXCLUSIVE DISPATCH.)

LONDON, May 24.—(Delayed).—I record my conviction, based upon personal investigation in large areas of France and Belgium and on talks with the best informed people in Europe that the United States has hardly a friend left in Europe.

Limitations on the use of the cable forbid the discussion of this bald statement. The people at home will be well advised to devote as much time and attention as possible to the study and consideration of our foreign relations.

Well-informed Americans view with increasing anxiety and alarm the international developments as they affect the vital interests of the United States. Maybe these fears are chiefly due to the policy of mystery and silence which surrounds the Peace Conference in Paris, and out of which comes a flood of disquieting and sensational rumors. Certainly everywhere one finds an atmosphere of intrigue and suspicion.

Tremendous forces are engaged in desperate struggles all over Europe. Imperialism and established order are in a fight to the death with the radicals and the revolutionaries. The great world religions—Mohammedanism, Roman Catholicism and Jewry especially—are active in the struggle—great financial and commercial interests are pulling powerful strings. Great empires are splitting up the world to suit themselves and the United States may presently be left holding the bag.

SECRECY AND SILENCE.

The worst of it all is that the statesmen of the world—including especially our own—seem to have universally adopted a policy of secrecy and silence. Every responsible leader with whom I talk admits the gravity of the situation, but says "Hush!"

"We feel we are living in a powder magazine," said one of the most highly placed Americans in London yesterday. Then he advised me not to send this dispatch for fear of its possible influence, not on the people of the United States, but on those of Europe.

I am quite sure the people at home and far away are too busy with domestic problems to see or appreciate fully the appalling importance to the future of our country of what is going on in Europe. I think they ought to know already as I can tell them what the situation is as I see it.

First of all, we have been almost entirely cut off from communication with America. For three days we were not permitted to send any cables, and all our communications with America are out of order, may be true, but one learns to be suspicious.

The indirect methods of the press censorship are many and our people, French, English and American, will stand the least offenders. Then, after all arrangements had been made for the reception of General Pershing and the French Ambassador in London, the whole thing was suddenly cancelled with the statement that doubt about Germany signing the peace treaty makes the step necessary.

DISTURBING RUMORS.

From Silesia comes word that an army of 120,000 is ready to fight to the death against annexation to Poland. Berlin declares the German war is over.

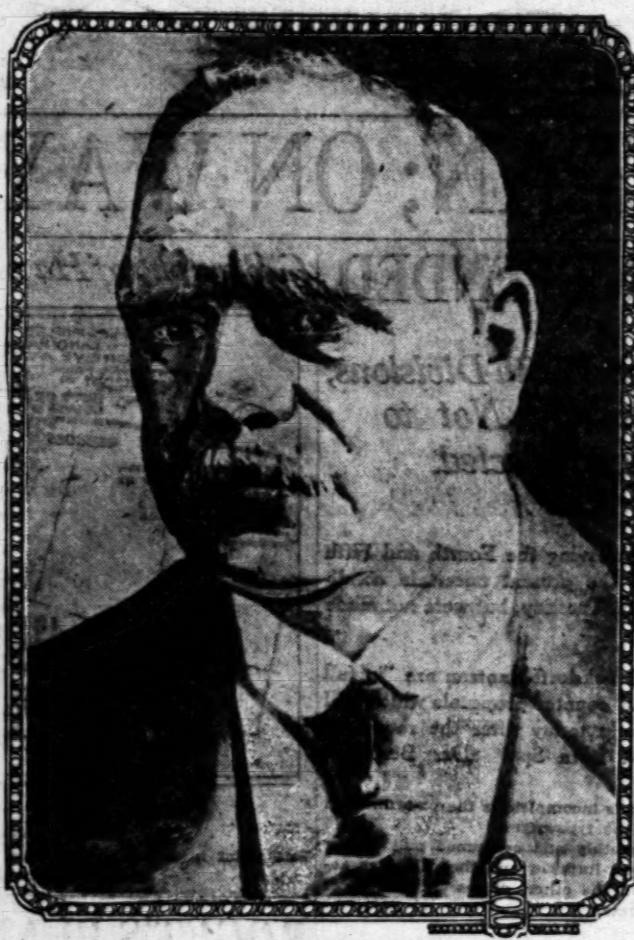

The British, French, Belgian and American armies on the Rhine get ready. The London papers announce to bomb Berlin. Paris says Marshal Foch has resigned because his recommendations are not adopted, but that the reason was refused. Possibly all this is true, but nobody is sure of anything.

The atmosphere all over Europe—especially in Paris—is cynical, sordid, almost vulgar and cynical. What is true today is a lie tomorrow. Even the Peace Conference changes its decisions so often that

MIDDLE WEST NEWS IN BRIEF.

(EXCLUSIVE DISPATCH.)

ST. LOUIS, May 25.—August A. Bush, head of the Anheuser-Busch Brewing Association, said last night that no decision had been reached by his company to resume the manufacture of 3% per cent beer, action by the board of directors having been deferred until an opinion could be had by the association's counsel.

The French Croix de Guerre, a posthumous award to Corp. Irvin E. Schinner, a member of the Sixth Engineers, who was killed in action November 11, has been received by his parents, Mr. and Mrs. Ignatius Schinner, 4831 Melvill Street, Milwaukee.

Incidentally, in spite of Premier Lloyd George's promise to implement the return of British troops to Russia, a force has been landed for the advance on Petrograd, and the British government has sent an additional contingent in Russia in which the Allies are fighting the Bolsheviks in aid of the Kolchak government. And the Foreign Affairs Minister of the Czar, is now in London after a stay of some weeks in Paris.

STORM KILLS FIVE, DOES GREAT DAMAGE.

(IT'S A NIGHT WIRE! BEAUMONT (Tex.) May 25.—

About five persons lost their lives and scores were injured as a result of the storm which swept over Southeastern Texas and Louisiana yesterday.

Property damage was considerable in Beaumont, Orange and Port Arthur. Oil derricks were blown down and lightning ignited tanks and houses.

The Missouri-Tulane Petroleum Company's 55,000-harrel tank here was still burning tonight.

Why Dentistry is Costly "The Double Cost"

Chapter I.

Is Dentistry Costly? Yes.

It is, at present, costly for the dentist as well as the patient.

The standard of fees is higher than it need be. A reduction of 30 to 50 per cent, can be made without lowering the quality of work or the income of the practitioner.

The average dentist doesn't make much money. Dentistry at present fails to attract the best minds in the country. It doesn't pay enough. Why? Is it because there are too many dentists? No.

Every man and woman in the United States needs the services of a dentist, not once but several times in life.

And let us not forget the children. It has been shown that more than 97 per cent. of our school children have diseased or faulty mouths.

One-third of the men of military age in England were found unfit for military service on account of bad teeth.

Our condition in this respect is not much better, although we have the best dentists in the world.

Dentistry is too costly. Why it is so and how its cost can be reduced I shall explain in articles to follow.

Twenty-five years of my professional life have been spent in devising a system to reduce the cost of dentistry without lowering its quality.

Under the E. R. Parker System scientific dentistry is performed at the least cost.

Painless Parker Dentist

(EXCLUSIVE DISPATCH.)

INDIANAPOLIS, May 25.—Al Donohue, director of the Salvation Army home service drive in Indianapolis, announced yesterday that his organization is all ready to start the campaign for funds early Monday morning. Mr. Donohue, and Vice-Director H. G. Fellman, has perfected an organization of 6000 workers, each division working under the direction of an executive from the Elks' Lodge.

Indianapolis' airplane passenger service will open during the speedway and State Fair week. Major Frank Mallieux, Ann Arbor, Michigan, and Bernard Ryan of Jackson received a fractured rib in the annual sophomore-freshman rush at the University of Michigan.

Frank M. Meyers, son of Mr. and Mrs. Frank M. Meyers, will enter West Point, June 12, as an appointee of Congressman Charles W. Nichols.

Frank Schroeder, aged 42, former Drain Commissioner, member of the famous Clipper Quartette, is dead at his home, 579 St. Antoinette street, from pneumonia.

Bill Jones, Tiger King, for the past three years, has been sold to the Boston Americans.

KANSAS CITY, May 25.—The Hatt Motors Company has entered the airplane field. As a start, they will have twenty planes of the same model and similar design for each. Mr. Hatt will engage a corps of pilots drawing on seventy men whose efficiency has been demonstrated.

The two Van Noy suburban homes near Swan Park, were sold last week. Andrew W. Kramer, lawyer, former Mayor of St. Paul, and three times candidate for the Senate, is the new owner of one. He will join the Democratic nomination to succeed Representative Carl C. Van Dyke, who was buried here yesterday.

Walter Lutz, 10 years old, was kidnapped near his home Friday, taken into an automobile and carried out of the city two hours looking men, according to the story he told the police today. Just after the automobile crossed the city limits one of the men lost his way and was captured by a companion, hurried the lad from the car as it raced along the roadway. The boy was severely cut and beaten, however, reaching there about 2 o'clock this morning.

MINNEAPOLIS, May 25.—Our City men have received the insignia of the Knight Commander of the Order of St. Gregory, one of the highest honors granted by Pope Benedict X. The men are L. S. Donaldson and Morris McDonald of

MINNEAPOLIS. (EXCLUSIVE DISPATCH.)

Donaldson, Chairman of the Chamberlain's Tablets. They strengthen the stomach and enable it to perform its functions naturally. They also cause a healthy appetite and good health. You will be surprised when you see how much better you are feeling after taking a few doses of them.—[Advertisement.]

Good for Indigestion.

If you are troubled with indigestion, take a few doses of Chamberlain's Tablets. They strengthen the stomach and enable it to perform its functions naturally. They also cause a healthy appetite and good health.

Sundays, 1 P.M., the day of the Sopwith's take-off from St. John's when the Glendale was about 20 miles off the Irish coast, at 20,000 feet, the plane was received by Capt. Montague Fenn, manager of the Sopwith expedition, as evidence that news of the plane was not properly broadcasted in connection with Chamberlain's arrangements. The Glendale广播ed information it received, but somewhere in the Atlantic this information apparently died, at least for days.

Beauty in Old Age.

You often see a beautiful old lady,

and she seems to be as happy as she is beautiful for beauty and happiness depend largely upon good health.

Indigestion or constipation are to a great extent responsible for these conditions. They strengthen the digestion, invigorate the liver and move the bowels. This makes you feel better and look better. Try it. They only cost a quarter.—[Advertisement.]

(Continued from First Page.)

hour and a half it took the Danish steamer to effect a rescue.

The news of the rescue has electrified all Britain. Eight destroyers, after a search of the Atlantic for 50 miles from the Irish coast, had given up the quest and there was practically no hope that the aviators were alive.

This morning, however, the forlorn hope that the aviators might be picked up by some craft without warning was realized. The Danish steamer Mars, sailing alone at nine knots, was the lucky vessel, and her brief message to the watchers at the Butt of Lewis, as the procedure on her was to do, left the public to speculate wonderingly over details of the airmen's adventure.

The Daily Mail instructed all signal stations to try to communicate with the captain with the urgent request to land the aviators at some port.

Nothing except some great battle has excited London more than to-day, unexpected tidings. The news of the rescue of the two aviators from the Atlantic has been introduced asking for one or more captured German cannon or other field-pieces for towns from Maine to California.

The States that will be most thickly dotted with implements of war, if requests are granted in order of seniority and if the supply holds out are Ohio, Wisconsin, New Jersey and Illinois.

Sixty bills have been introduced on behalf of Ohio, forty-two from Wisconsin, forty-seven from New Jersey, thirty-eight from Illinois, thirty-four from Kansas, thirty from Indiana, twenty-five from Texas, eighteen from New York, nineteen from Iowa, thirteen from Wyoming, eleven from Rhode Island and the number from every State is mounting rapidly.

Airman cannot seem to be much less popular with the American public, though a number of requests for these are still on file.

Immediately afterward he received the following, originating at St. John's: "Airplane on signal DKA leaves St. John's for Ireland in two hours' time. Speed 100 miles per hour. All ships sighting the same should be on deck at 8 a.m. to observe the departure of the aircraft." The message was addressed to the commanding officer of the U.S. naval forces in the Atlantic.

Five minutes later the Glendale had relayed this message to all ships in the vicinity.

The following morning the Glendale sent the following to all ships broadcast: "It is advisable that all ships stand by for the arrival of the aviators from the Atlantic." There are no American officers in charge of the ship.

At 10:20 G.M.T. the Glendale got a message from the cable ship Faraday, which read: "Urgent: Airplane on signal DKA to be on deck at 8 a.m. to observe the departure of the aircraft."

At 10:45 G.M.T. the Glendale got another message from the cable ship Faraday, which read: "Urgent: Airplane on signal DKA to be on deck at 8 a.m. to observe the departure of the aircraft."

At 11:00 G.M.T. the Glendale got another message from the cable ship Faraday, which read: "Urgent: Airplane on signal DKA to be on deck at 8 a.m. to observe the departure of the aircraft."

At 11:15 G.M.T. the Glendale got another message from the cable ship Faraday, which read: "Urgent: Airplane on signal DKA to be on deck at 8 a.m. to observe the departure of the aircraft."

At 11:30 G.M.T. the Glendale got another message from the cable ship Faraday, which read: "Urgent: Airplane on signal DKA to be on deck at 8 a.m. to observe the departure of the aircraft."

At 11:45 G.M.T. the Glendale got another message from the cable ship Faraday, which read: "Urgent: Airplane on signal DKA to be on deck at 8 a.m. to observe the departure of the aircraft."

At 11:55 G.M.T. the Glendale got another message from the cable ship Faraday, which read: "Urgent: Airplane on signal DKA to be on deck at 8 a.m. to observe the departure of the aircraft."

At 12:00 G.M.T. the Glendale got another message from the cable ship Faraday, which read: "Urgent: Airplane on signal DKA to be on deck at 8 a.m. to observe the departure of the aircraft."

At 12:15 G.M.T. the Glendale got another message from the cable ship Faraday, which read: "Urgent: Airplane on signal DKA to be on deck at 8 a.m. to observe the departure of the aircraft."

At 12:30 G.M.T. the Glendale got another message from the cable ship Faraday, which read: "Urgent: Airplane on signal DKA to be on deck at 8 a.m. to observe the departure of the aircraft."

At 12:45 G.M.T. the Glendale got another message from the cable ship Faraday, which read: "Urgent: Airplane on signal DKA to be on deck at 8 a.m. to observe the departure of the aircraft."

Angels Take a Pair and Tigers Grab a Game.

CAUSE OF NERVOUS WRECK.

Seattle Worse than Bolshevik to Mayor;
Angels Take Two.

BY HARRY A. WILLIAMS.

We know now why Ole Hanson was almost a nervous wreck when he came here a while back for a much-needed rest. It wasn't the Bolsheviks who put the Mayor on the bum physically, but the Seattle ball team.

Mr. Hanson quelled the Bolshevik uprising, but he couldn't suppress the town team. He can't very well deport it as the men on the team were born in this country. However, it is felt that he would be justified in shooting it at sunrise.

Seattle succeeded in losing the remainder of the series yesterday, when the Angels won 3-2 and 6-1. This gave the Powers pack a clean sweep for the series. Of course, this result was not due entirely to the fanatic team which Chimes and his bunch will field for the Rocky Mountains make the majors pretty safe, forming a natural barrier between them and the Coasters.

Knowing that it would be another Roman holiday, a large crowd was out to witness the afternoon slugging match between the Angels and the Dons. One Cran dall and Cy Farnier had a fine game in which the Dons had all the better of it. Seattle scored one in the first round, and Cy was a great success in the second. The Angels had three runs in the sixth, but the Dons had four. The Angels took the lead in the eighth.

Cran dall is getting so that he can pitch as well as any man in the league. He pitched his way to victory through a rainstorm the other day, and yesterday won his first victory of the season in the sun. Don had proved that he is the equal of his warm-up performer, and you can take him at his word.

Seattle wanted to show the Sunday-afternoon crowd something right from the start. They sought to make a good impression in the first inning that would last all the afternoon. The Angels had a hard time, but Harper singled out with a bunt and Harlan flied to center. Knight kept a steady, putting Harper on third and then scored when Ken Clegg hit a single. The Angels had two more in the fifth and eighth.

One run was a lead that held for six rounds, and Seattle got to feeling a good deal of self-respect.

It was not conceivable for five rounds. The Angels would come up and knock a triple do to and then, but Sam is liable to do that off anybody. He did to the Angels, who were not half bad.

PEN POINTS
BY THE STAFF.

Rah for Hawker!

It seems too good to be true.

He will make it, surely, next

indications of more Balkan

lash.

Who created the brazenous expen-

sion, "overhead expense?"

No trouble at all to sail across

Atlantic in an airplane—in the im-

mation.

The fourteen-poinsettia will

front yarda.

Another thing will our Presi-

dent come back from Europe after

1, with his fourteen pines?

Why not have a municipal

field for the airplane flying here

town?

Secretary Burleson ought to

punished some way. Why

nominate him for Vice-President

the Democratic ticket in 1920?

If the price of the hog or the

to continue to avista, he will

the American king, super-

the well-known and popular

one.

It is proposed to change the

of Mr. Rainier to Mr. Rose

And there is an argument on

sides of the question. We pro-

to be an innocent bystander.

One of the officials to be re-

gated by Congress is Albert

Burleson; but it is a dollar

cookie that no committee will

discover that he ever resigned

thing.

The newest, up-to-date

gowns have fancy buttons sev-

over them. It is well that the

ers are not obliged to see them

they would never have time to

downtown.

We might as well make up

mind that we are entitled to

be a member of the

league we shall be compelled to

those from many things. But

a man who joins the church has

same job.

With the opening of the sun-

bathing season it is up again

the authorities to ban the

most ordinance to prohibit

the beach. But the tools

the lawyers have never been al-

defined spooning.

There are all sorts of insipi-

the returned soldiers indicating

branch of the service in which

served and brave deeds per-

But we fail to see anything

memorating the bravery of the

lows who carried the main

all.

Some day an architect will

a bit by drawing plans for us

with about half of the world

eliminated. Of course there

to be a door to keep the

the kitchen from the balance

interior, but that should be

all.

The figures showing that the

wheat crop in the United

will not be less than 100

bushels indicate that the

world will not have to go to

its favorite cereal. We are to

the wheat, all right, but how

prices?

If the covenant of nation

comes an actuality, all roads

forth will lead to Geneva, then

the new capital of the

Geneva has been called the

ancient Rome" ever since the

John Calvin, and the older

of The Times will recall the

Alabama award was made

1872. Byron immortalized

"The Prisoner of Chillon."

TOPANGA.

We drove into the canyon

side.

Our glances leaped, that we

lose

No glimpse of beauty, and we

It in

As wanderers on a desert

atmosph.

Now we wound our way

before

In purple distance gleamed

wonders soft.

Enchanting in their loveliness

breath

Of hidden flowers stole on us

the deeps

Of cool, mysterious silences.

The mighty cliffs showed

against the sky

climbed,

And looking down the wind-

we saw

The fast receding peaks grew

and dim,

Their contour softened by a

base,

Allured pale—"the blan-

hills."

We reached the crest, and the

low

Lay the broad valley, sum-

repose,

Calm in its splendid

changing hues,

Varied the marvelous light and

where towns—

Dotted its breast. Peaceful

it lay,

Filling the soul with that

sense of rest.

One might imagine lost in the

LAURA ANDSEN POWER

16,820 Citizens of Los Angeles Have a Secret

SEE THAT MAN COMING DOWN THE STREET—that fine-looking man who walks with a quick, confident step? Take a good look at him as he passes.

You're right; he does look like somebody of importance—he is. I'll tell you the reason for that keen, alert expression, that appearance of live interest and mastery. He has made a discovery. He has gained possession of a secret that is making him a leader among the people of Los Angeles. He is one of the 16,820 men and women to whom the city looks for guidance in every business and social movement, upon whom it depends for every possible service and in every important crisis. They are gaining profit and distinction for themselves, and they are making this city a tremendous factor in the business and political supremacy of the Nation.

Yes, I'll tell you what it is: They have discovered the way to **see into the heart of the world.**

They've found out how to know the thoughts of men and understand their acts. They can see what the world is doing in every great city, and council chamber, on every highway, farm and battlefield under the sun. They know what men and women of clear vision and good judgment are saying about the new social, educational, religious, political, and industrial problems and the changing business and economic conditions of today, as well as the serious national, international, and racial problems that are crowding on us for settlement.

They have found the magic "receiver" with which they can "listen in" on every live wire of news, and wherever opinions are expressed, or controversy rages hot. And so they possess themselves of the inside facts on all sides, and the rock-bottom truth of every vital subject, and it gives them freedom and authority.

But that isn't all. They have found the point of **connection with the sources of power**, and have joined themselves with the great forces that are remaking the affairs of this city and Nation and changing the destinies of all mankind.

You have seen how great nations have been swayed with passion, how men have spoken to the world like flaming prophets, how soldiers have hurled themselves into the fiery gulf of war, how women have endured privation, and toil, and deadly peril to minister with gentleness and healing to the world's sufferers. You have seen miracles of labor and of heroism, you have seen marvels in business and professional achievement, you have seen wonders in the individual mastery of men and of circumstances, and you have known that behind, and beneath, and above, and within all these things is **POWER—the operation of invincible forces that conquer all hindrance and laugh at the impossible.**

That man who just went by, with the firm stride of a master of men and of things, has found a way to touch that Power—to throw on the switch and let the eternal forces flow into his soul. He has learned the secret of opening his mind and his heart to the KNOWING and the FEELING of the great life and thought of the busy, throbbing world, as they come to him, full and true, at the end of each week, from thousands of cities and towns in every land, through his "master receiver," **THE LITERARY DIGEST.**

"Listen in" for a moment!

THE LITERARY DIGEST has asked 2500 daily newspapers throughout the United States their opinion of the League of Nations. Their replies come to you over "The Digest" live wire. They bring you more than

information. "Running through the great mass of replies, you have the sensation of **touching something hot.**" You **KNOW** and you **FEEL** the mind and heart of America on this thrilling question of world welfare.

THE LITERARY DIGEST gathers from many eye-witnesses the lurid picture of the Russian Bolshevik "heaven on earth," where "maniacs stalk raving through the streets," and "human flesh is sold as food." You **KNOW** and you **FEEL** the ghastly facts, and the love of America burns more fiercely as you vow protection for your homeland.

A wonder-story comes to you through **THE LITERARY DIGEST** of modern safety devices and methods in American factories which already are saving the lives of 13,000 American workers every year and causing a better understanding between employer and employee. Instantly, you feel a warmer glow of brotherhood and co-operation in our busy life together.

Listen again! **THE LITERARY DIGEST** is asking a searching question of 190,000 ministers and 42,000,000 church members of all denominations in the United States. "What is going to happen to a divided Church in the face of the present great crisis of need and opportunity? Is the Church immune to the lessons of the War?" **KNOWLEDGE** of the startling facts **THE DIGEST** is giving, rouses a new thrill of responsibility and purpose.

Now—catch some of these great business bulletins coming over **THE DIGEST** wire: A ten thousand mile new railway route from the busiest centers of the United States straight into the heart of South American markets! Unexpected tips on merchandising and profit-taking revealed by Government weather maps! How American furnaces can stop the waste of millions of tons of coal every year. Such **KNOWLEDGE** is money to those who have **THE DIGEST** "receiver" at their ears.

Hold the wire! You don't want to miss these stirring "Lessons in Patriotism" and stories of "Nations in Rebirth" coming over with every week's issue. Here is a story of the "Poles in the United States"—really a complete condensed history of this great people and their ancient nation now being reborn into liberty. Here is the story of Greece; and now comes the tragic tale of Armenia escaping from the barbarous thraldom of the Ottoman Empire. "The Case of Schleswig" craving to be reunited with Denmark; the "Lithuanians in the United States," and so on—little histories big with meaning, thrilling with interest to Americans who must live and work side by side with these people and help them on and up into a larger Americanism here, or a larger, freer national existence in their native lands.

No man or woman can be in close touch with all these big, live things of the world without growing bigger of mind and heart, and gaining a richer, more keenly sensitive life. And their reaction upon every business, social, and personal interest he may have is of the greatest benefit to him. It makes him quick to understand and appreciate real values, quick to see and use passing opportunities, strong in his influence upon his friends and fellow-workers, valuable as a citizen, successful in his individual affairs. How unfair it would be if such advantages were exclusive—obtainable only by a few! How fortunate that any ambitious, purposeful man or woman may get possession of the same secret of personal power, and larger life. It is possible for **you** to have this "magic receiver," **THE LITERARY DIGEST**, in your own home, and to **KNOW** and **FEEL** the great heart of the world as its pulse-beats reach you through the crowded pages of **THE DIGEST** every Saturday night. Then, in a new and larger sense, you will share the exultation of Monte Cristo as he stood up and cried, "**THE WORLD IS MINE!**"

SAYS RIGHT THINKING IS HEALTH.

Importance of Mental Cleanliness is Emphasized by Christian Science Lecturer, Speaking in Los Angeles Churches.

Praying is a synopsis of a lecture on Christian Science delivered to the public last Saturday. The First and Ninth Christian Science churches of Los Angeles by Frank Bell, manager of the Board of Lectureship of the Mother Church, the First Church of Christ, Scientist, in Boston:

Christian Science has been called the science of right thinking. Its practice is the activity by which wrong thoughts are compelled to give place to right thoughts, that the fruits of right thinking may appear instead of the fruits of wrong thinking. The method is scientific and the purpose Christian.

Nothing could be of greater importance than the science of right thinking, because all there is to living is thinking. We build on a false and transient basis or on a true and lasting one according to the nature of the thoughts that comprise our sense of existence. This would not be pleasant to contemplate were it true that we were born under the pendulum control. Christian Science shows the willing student not only how to distinguish right thought from wrong, but how to select the one and reject the other, and thus to have dominion over the shaping of his career.

The boulders of houses were to sleep over and offered, with regard to you, is source, quality or adaptability, can you imagine the result? If we never failed to discern the difference between what would you look for a fabric of value? So, the chemist in his laboratory, the farmer in his field, the manufacturer at his bench must now select accordingly. How, then, can it be expected that man, whose life consists of the thoughts he thinks, very often in mental can realize harmonious and desirable conditions without intelligently controlling the thoughts that shape and control his conduct?

MATERIAL NATURE OF DISEASE.

That the evil called disease is the outward expression or effect of a mental state is more and more generally acknowledged. The growing science of Christian Science, of which all manner of disease is healed by treatment applied solely to mental conditions, is helping mankind to the realization that its secret is in the working out of wrong thinking. This does not mean that a person who has a particular disease must have been thinking persistently about that disease; but it does mean truly that no man liveth unto himself. Since living is thinking, then no man thinketh unto himself. Life is the expression of mental influences of which we are not definitely conscious. Consider, if you will, the myriad thoughts and sensations that have entered into the simple matter of your being here at this lecture, that have made possible the common notices the citizen sees year after year, the hours you pass out of the steam or electric car or automobile, in which you ride, the streets you tread, the years and years of thinking that have had to be done to make all these available to you within a few minutes and with the slightest mental effort on your part. The simple process of thought, which is the working out of wrong thinking, is the working out of the thoughtless, slack, and is out of touch with the fair-play spirit of our times.

Thus, when the victim of drink or drugs thinks he is getting science, he has, first, a sympathetic appreciation of his learning to get away from an unsatisfactory sense of self, and, secondly, a sense by which he can do through a steady stream of right thinking instead of through intoxication. The notable success of Christian Science in the healing of intemperance is attested by a multitude of witnesses.

HELPS THE BUSINESS MAN.

Right thinking is the business man's best asset, his surest guarantee of success. The subtle, many-sided results of the so-called success that is built on deceit, fraud and greed is not genuine success, and brings to its possessors no real happiness. The secret of success lies in the fact that evil cannot be done, no matter how good it may appear for a time. The right thinking business man knows how to turn the subtle, many-sided results of a false and material mentality that would justify a wrong act for the sake of a seemingly worth while purpose.

He knows how to build success on wisdom and honest dealing. Business to him is not a system of fattening the weakness or cruelty of his neighbor, but a system of helpful service. It is generally agreed that those who are on a higher plane than before.

The reasons for the improvement in commercial morals are not fully known to those who are unaware of the business world in which business men are turning quietly to Christian Science for the solution of their business problems.

THE RIGHT TEXT-BOOK.

The rule and method of the science of right thinking are set forth in the text-book of Christian Science, entitled "Science and Health with Key to the Scriptures," by Mary Baker Eddy. This book contains the complete statement of Christian Science, what is and is not, it can do, and applies to all I have known persons, and applies to all who have not yet learned that could not understand this book, when, in fact, they had searched it only for confirmation of their preconceived and mistaken ideas of its purpose. Persons who expect Mrs. Eddy's writings to teach them to be sumptuous hypnotists or mesmerists, to conquer disease with mental suggestion or will power to heal disease by calling it names, to overcome evil by ignoring it, to remove disease by passing it on through a convenient cloaking of the eyes, to coin dollars and cents out of a mummery of words, or to do anything else that is absurd, grotesque, unnatural or logical, are bound to be disappointed.

Considering the title of the book as indicating its purpose, we observe that the author of the book therefore is intended to establish a relation between science and health, or health and science, to prove the health to be found in the result that is mental or spiritual, not physical. Associated with the words "science" and "health" are the words "truth" and "scriptures." Thus the further intent of the book is to show that the knowledge that is synonymous with truth is religious knowledge and is to be found in the Bible.

The title of the book, "Science and Health with Key to the Scriptures," gives notice that the purpose of the book is not to teach health only, that health is a matter of science or knowledge, that is to say that it is the result of education, but the infinite intelligence, God, and that the provable knowledge of that fact is to be obtained through the unlockings and unfoldings of the "Scriptures."

One who has gained quickly the largest benefit from his study of this book will do well to remember that it is not a pliable popularized scientific text-book, and therefore offers little theory to be argued, but a method to be tried and judged by results.

The code of Christian Science is

completely contained in the Bible.

VICTORY OVER DRINK.

An example of the effect of wrong thinking is the victim of the disease known as intemperance. His material body appears to have been adjusted to the condition of intemperance. Nothing of the kind actually has occurred. Education is a mental process, and desire is an activi-

ty of thought. A body composed of unthinking water and mindless tissue could not have been educated to desire or to act. So then, the inebriate's bid desire is to drink. The Christian Science Journal, official organ of this church, lists the names of 6000 registered practitioners of Christian Science, an average of one to each city and town, who, even at much personal sacrifice, devote their time to Christian Science healing.

GREAT INTEREST SHOWN.

The church maintains a board of lecturers, whose members endeavor especially to meet the needs of those who may have little or no knowledge of Christian Science, but who wish to know whether it offers a practical way out of human ills of whatever sort. The extent of the interest in this direction indicates that the 1919 lectures were heard last year by approximately 1,300,000 persons. Another unique feature of the Christian Science movement is the free public reading-room maintained by each church.

Although never mindless that the spiritual need of mankind is spiritual, and human, and which physical healing is an incidental effect, the Christian Science church does not neglect its humanitarian sympathies. In time of public emergencies the financial response is prompt and generous, and its members usually are found to be doing their share in any emergency.

The Christian Science church is a self-sustaining church. It makes no claim on the community at large. It builds its own church buildings without solicitation of money from outsiders and with little or no such contribution among its own members. It dedicates its church free from debt.

The demand for Christian Science literature is constantly enlarging, publication facilities in Boston now employs 700 persons. From this house come the works of Mary Baker Eddy, both quarterly, monthly and weekly periodicals, the Christian Science Monitor, a great daily newspaper of world-wide circulation, and quantities of other literature, some of it in eleven lan-

guages.

PIONEER WOMAN DIES.

First Teacher of Santa Barbara Passes Away Here.

Mrs. Alice S. Morgan, 33 years old, who came to California fifty-six years ago and was the first school teacher in Santa Barbara, died yesterday morning. She came to California by way of the Isthmus of Panama in 1863, and then went by stage to Santa Barbara. She also taught in the first schools in Carpinteria. At that place she married George W. Morgan, January 21, 1868. They came to Los Angeles in 1872. Mr. Morgan died here January 9, 1893, and the body of Mrs. Morgan will be buried beside him in Evergreen Cemetery, tomorrow afternoon. The funeral service will be conducted at the chapel of W. A. Brown, 1213 South Flower street.

Mrs. Morgan leaves two daughters, Mrs. Edith M. Morgan, a daughter-in-law, Mrs. Julia C. Morgan, widow of Arthur J. Morgan, and two grandchildren, Julian and Alice Morgan. Dr. J. Whaley, physician to the family, will conduct the service.

DRESSMAKER SAVED FROM OPERATION

By Taking Lydia E. Pinkham's Vegetable Compound in Time.

Ithaca, N. Y.—"Three years ago I suffered from pain in my right side, so severe that I could not raise my feet from the floor. Pains would shoot down my limbs and through my back, and the doctor said I had cancerous disease. I was in bed two weeks with an abscess on my side and expected any day to die. My experience has taught me that the effort to make a man buy something he does not want in the long run costs its own price. No business can develop except as it promotes the interest of those who use its goods or services. In salesmanship, greatest unsuccess is the most enlightened selfishness. The best sales man puts his ideals above his profits in commercial morale, are not failures to those who are unknown to him, in which business men are turning quietly to Christian Science for the solution of their business problems.

ZEPHYR GINGHAM

32 inches wide; best grade made; in all patterns and plain colors; reduced from \$1.25 to yd., 95c

PLISSE CREPE

TRIXIE MOTORIST.

WILL DRIVE CAR TO 'FRISCO AND BACK AGAIN.

By Grace Kingsley.

Having purchased a big, new, shiny car, which already, she says, will take gasoline from her hand, and with sublime faith in her own invincibility, Trixie Friggina, the Orpheum star, is going to motor to San Francisco for a short vacation, and what's more, she's going to take the wheel herself at such time as the party leaves for her party, viz., her sister Bess and her brother-in-law Tom, will permit.

Following this vacation, providing all goes well, she will go to the West Coast, where she will be a Hollywood bungalow all decked up with Cecile Brunner roses. She will spend a month's vacation there.

Spending her own money, motorized by hand, Miss Friggina confessed she wasn't an expert at the business.

"I know, when I drive all the telegraph poles are made of rubber and they bend over and come together in the middle of the street. The car chews and swallows and all I can see is the wire."

"If there is anything left of me when we get back to Los Angeles you won't do my bungalow all that's the matter with it—I don't like the color, I'm going to choose a cheerful color, probably green. It is combed for names significant to the reading public. A radical departure will be made in production, adaptation and direction. The pictures will be made under the supervision of each author. These pictures will be made at the Goldwyn studio, Culver City. In addition, another studio near New York may be used.

The reason for the formation of the new corporation said to be the distortion of stories in ordinary adaptations, and a very good reason that is, too.

Miss Minter Breaks Contract.

Mary Miles Minter, it appears from reports, broke her contract and has suddenly picked up her doll rags and gone to the American studio and left for New York. It is rumored there was such strong disagreement between herself and the powers that be that she has given up the idea of staying with the company.

The reason for the formation of the new corporation said to be the distortion of stories in ordinary adaptations, and a very good reason that is, too.

MANY GORDON GOWNS AT ALHAMBRA.

When a film hasn't recited fifty feet before a man and a woman are doing a "round-and-round" scene, without any advance information, you are likely to sit up and wonder what in the name of the great Klieg lights is going to topple off next.

It is not, however, a picture that has too many turns, but a picture that has too flat an ending and still be a very fair picture in the middle. Here the story of a girl from a foreign country, gradually growing in character. It also affords Kitty-the-beautiful-clown model Gordon a chance to wear a series of very elegant gowns to suit a variety of social functions in the 400 set and also down among the four million.

The story, however, is not funny as funny as only Mabel can be, viz., Perley Poore Sheehan's "Upstart," "Heartsease," etc.

Mr. Goldwyn is not so easily fooled into anything.

Mr. Goldwyn, after calling "Mr. Goldwyn," about their third name "Goldwyn-Goldwyn," corrected Goldwyn's head.

"Well, my gawd!" exclaimed the perturbed employee, "can't you give a feller a few rehearsals?"

What's the Use.

And now, with the possibility of planes sloping in airplane to be married, there'll be absolutely no chance of keeping track of their weddings.

There's More To It.

After a long, drawn-out argument, he's going to be divorced. They've decided to settle their differences out of court, and rumor has it they may shortly kiss and make up, and settle together once more in vaults.

Hard to Believe.

It is rumored that there's a returned soldier in town who does not hope to get into the motion pictures!

Marjorie Rambeau Soon.

There's a new bungalow out at Glendale that is being assembled up inside and out, and in which a certain boudoir is being redecorated and refurbished. The bungalow is the home of Marjorie Rambeau, who is within a few days, and who will take up residence before returning to New York to commence rehearsals in the new Robert McLaughlin piece, "A Pearl of Great Price," which A. H. Woods is producing.

It is rumored that Miss Rambeau may make a picture during her "rest" in the west.

Want a TRENCH HAT?

(LOCAL CORRESPONDENCE.)

POMONA, May 25.—Who wants to buy 400 perfectly good steel helmets? They are guaranteed to wear well and be of good material. It is the United States government who is trying to sell them and the officials have communicated to Secretary Bayard of the Chamber of Commerce that his co-operation in consuming the dead steel helmets are now at Camp Mills, in New York. In its communication the officials say regarding the helmets, "These helmets are not and were not especially adapted for use in shipbuilding construction and large industrial concerns as a means of protecting their employees while at work. No bid for less than fifty helmets will be considered."

FILMS.

AUTHORS' COMPANY.

BIG NEW CONCERN IS TO MAKE PICTURES FROM NOVELS.

By Edwin Schallert.

Producers are constantly on the alert for new characters, enlarging the pictures scope in the visualizing of various phases of daily life. Chief among the drawbacks to consistent progress have been the lack of good material and the confining of cinema development within narrow boundaries. Several attempts have been made to hit upon a new expression more closely resembling the novel than the drama. One of the most successful of these is the picturization of Harold Bell Wright's story, "The Man of the Match," which the late R. Rex Beach set about creating the screen novel, and achieved quite a success with his photoplay "The Man of the Match," which was a new note in picture-making.

Now, Mr. Beach is again vanquishing the procession of novelists with another plan for turning stories into pictures. He has allied himself with Samuel Goldwyn in this enterprise. They announce formation of the Eminent Authors' Company, owning exclusive picture rights for a long term of years on all works by famous writers in the English language. The names mentioned in the wire from New York tell of the new incorporation. Include Rupert Hughes, Mary Roberts Rinehart, Basil King, Gouverneur Morris, Gertrude Atherton and Leroy Scott.

Rex Beach is president of the company and Samuel Goldwyn chairman of the board. It is stated that the writing world is being combed for names significant to the reading public. A radical departure will be made in production, adaptation and direction. The pictures will be made under the supervision of each author. These pictures will be made at the Goldwyn studio, Culver City. In addition, another studio near New York may be used.

The reason for the formation of the new corporation said to be the distortion of stories in ordinary adaptations, and a very good reason that is, too.

MUSICAL.

OVATION TO DIVA.

SCHUMANN - HEINK CONCERT HAS FESTIVE ATMOSPHERE.

"GINGER" SNAPPY AT HIPPODROME.

By Jeanne Redman.

The name "ginger" to many people calls up a vision of hairy brown hair. It may possibly remind others of cinnamon and pepper. But after seeing Violet Palmer at the Hippodrome in "Ginger," a definite feeling of the word becomes sort of hairy and one begins to think of ginger beer, ginger ale, ginger and spicy combined. All that just be cause of one of the prettiest love stories ever filmed. To really understand "Ginger" is to realize that when she first came to the stage she had been back seven years when the story begins; it ends back of the front-line trenches "over there" with millions of others. Did you try to find the plot in a musical comedy? Well, maybe, did—if you weren't too busy looking for an eye on the prima donna, and the audience's eye on the chorus. "Hello, Tokio!" is just a miniature musical comedy having the same characteristics as its big brother, "Love Me Tonight." The women's clothes right. Bessie Clifton as the village cut-up furnishes the laughs, while the Heyns put over something else. Paul Draper, with whom she had been telling the audience, is the Jimmy and the gal dressed in "Ginger's" costume, and the story ends with a kiss.

The story, however, is not funny as funny as only Mabel can be, viz., Perley Poore Sheehan's "Upstart," "Heartsease," etc.

Mr. Goldwyn is not so easily fooled into anything.

He's got a plan for "Ginger" and it's a good one.

It is a good one, too, for the story is not an extraordianrly good picture; nor is it a bad picture. The minister's altogether unsuitable plan for bringing up the girl is something to be forbidden after July 1, and making a fool of himself causes a banal ending.

Otherwise he's a good enough actor in the play. The acting by Mahlon Hamilton in the role of the husband, whom the heroine marries against her will and imprisons her, is rather good.

W. H. Butt, as the minister, deserves the meed of praise.

DOUBLE BILL IS HIT AT PALACE.

AMUSING FILM.

The most deliciously devilish character in "The Delicious Little Devil" at the Superba this week is the cocktail. He has two scenes and he makes the most of the opportunity offered. The tragedie is told to tell what he has seen and that is a great deal, in view of the fact that the heroine has a swimming pool in her dressing-room.

The Miss Murray photoplay may be likened to a good old terrapin stew, with a little of everything thrown in for flavor. Miss Murray is Irish and she's full of fun. She may be in real life for all I know, but she conceives the happy idea of passing herself off as a certain sensational Gloria Du Moine, cabaret singer and heart pirate, whose name is almost a household word in the picture line-up of the occasion.

Miss Murray is a good actress.

The programme for the evening is a good one.

Further humor is added to the programme in the Christie comedy, "She's a Girl," with several other interesting shorts which complete a splendid programme.

Returns to Theater World.

Aubrey Strode returns with Klaw and Erlanger, but late in the government service as director of amusements in United States Army camps. He will take the lead in the theatrical game. Mr. Strode offered last week and from last week and immediately listed as manager of "The Shepherd of the Hills" company, now playing at the Colony. He has an intimate knowledge of conditions throughout the country, he was selected by Supervising Manager D. C. Martin because it is his specialty. Tchaikovsky's "Pathetic" will be rendered, which Miss Farrar never misses an opportunity of hearing. Godowsky will also be among the distinguished people present.

Local Artists at Musicals.

A large number of well-known local musicians were heard at the reception-musical, given by Mrs. Nella Nolte, pianist, last week, at Cherry street, with Mrs. F. Bridgman-Smith of New York and London as guest. Among those who played were some of the city's best known artists.

Miss Ethel Colby, dramatic soprano; Herold de Grosse, baritone; Conrad Fuhrer, violinist; Joseph Zeller, pianist; Miss Corinne Ray, Orpheum violinist; Joseph Zeller, pianist; Miss Nolte, played a group of numbers by Chopin and Liszt.

Jerry to Attend Symphony.

Conradine Farrar has been granted leave of absence from the set at Goldwyn studio for Thursday afternoon to attend the Los Angeles Symphony. On the strength of Tchaikovsky's "Pathetic" will be rendered, which Miss Farrar never misses an opportunity of hearing. Godowsky will also be among the distinguished people present.
